We would like to introduce GLM Registry. We are a husband and wife team with a deep commitment to our work, and we believe in providing a quality service with an exceptional product.

Besides all our great work ethics and dedication ;), one of the premier features we bring with us is our very powerful and specialized **Registry Database program and Online Order/Payment system for Members**.

We tailor the Members' Online Order/Payment system to blend with your unique style. Members will see your familiar Logo and Organization Name. These custom changes will all be done at NO CHARGE! {Yes, you read that correctly ;-) }

Our program increases accuracy by pulling information directly from the Registry Database and employs many double-checking features which allow immediate corrections before submitting the Order.

There is one incontrovertible fact about a Registry – the DATA is the asset. **The more accurate the data, the more valuable the asset**. The purpose of a Registry is to *protect your asset, which is the Data on every single animal in the organization.* We are meticulous in our procedure, which insures the integrity of every animal registered through us.

In our view, a Registry Database is not just tracking historical data, but USING that historical data as an aid for entering new registrations and transfers. Our simple-to-use yet comprehensive system insures more detailed accuracy and diminishes the loopholes for inadvertent errors.

We recognize that working with animals is a seven day a week adventure, and we are here to help you each of those days, including many holidays. Phone calls are returned within 24 hours (note: we are in the Pacific Time zone). Our general turn-around time for processing your Orders is usually 48 hours. We strive to make the experience for Members in dealing with their animal data to be as stress-free as possible.

Data on each Animal generally would include (but not limited to):
** See Example Screen Shots at www.glmregistry.com

Registration ID Number (assigned by a Registrar)
Flock ID/Tag#/ID#
Date of Birth
Birth Type (Single, Twin, Triplet, Quadruplet)
Physical Characteristics specific to the Breed
Father
Mother
Owner
Breeder
History of all owners (transfers)

(Older records may not have full data. We can only provide what is passed to us by your organization. All **new** registrations will reflect full information.)

We consider it of extreme importance that the Organization should have instant access to critical information. Board Members will be able view current information in 'real time'. This means that with every transaction processed, the new information is immediately available to you.
** See Example Screen Shots at www.glmregistry.com

Member Statistics:
- Total Member Records & Active Members
- YTD/Quarterly: New Memberships & Prior 2 Years
- YTD/Quarterly: Renewals & Prior 2 Years

Animal Statistics:
- Total Animal Records by gender/Active Animal Records by gender
- YTD/Quarterly: New Animals Registered by gender

View Financial YTD & Prior 2 Years:
- Invoices by transaction type (new membership, renewals, new registrations, transfers, other)
- Payments Received
- Balances

Download all Datafiles
Create & Download a Mailing Address File

The Board will also receive all hardcopy documents on a monthly basis. We scan every single document that comes through us, which even includes the envelope. We also make a hard copy of all emails from members. Each month, all the hardcopy documents are mailed to the Board for their physical records, while we maintain the digital copies.

For extra safety, we utilize a three-tiered backup system for all data and digital documents.
Our system provides your Members with an easy entry format.
** See Example Screen Shots at www.glmregistry.com

-Renew memberships (and update address, contact information, etc)
-Register new animals
-Transfer animals In or Out
-Request duplicate certificates
-Make corrections on certificates
-Maintain Status on their animal (active, inactive, deceased, sold, etc)
-View, sort & print a list of their registered animals
-View & print detailed information of their registered animals, which includes pedigree and history
-View & print general information of any registered animal, which includes pedigree
-Search for other members

Certificates of Registration: We can use your design, or create a design for you (ask for a quote). We use 70lb paper (your choice of color).

Forms in PDF Format: You can provide your own form, or we can create any form you may need (ask for a quote), and provide it in a PDF format for your Members. We can also make your PDF "interactive". This means that before printing, members can fill out the highlighted boxes on the form instead of handwriting.

We mail all documents by First Class USPS in an 8-1/2x11 envelope (to protect the Certificate of Registration from creases ☺).

Payment Receipts are either mailed or emailed (or sometimes both, upon request). Additionally, members may request their Historical Transaction receipts (this request usually occurs around Tax Time!)

Data Migration: This means your electronic data files are converted and formatted, which allows it to be integrated into our Database. This can be time consuming job, as we are very careful about every detail. If you are starting from manual files (not entered in a computer), we can do that data entry for you, as well as scan in your hard copies for future reference.

There are always unique situations that arise, and we will work with you to facilitate your needs.

How Pricing & Fees are determined ~

Monthly fees: Quoted
-- Transaction Fees: This will be dependent upon:
    * Your current average monthly volume
    * Any special requirements (eg: specialized paper, etc)
-- Postage reimbursement for end-of-month mailing of all hardcopy documents

Data Migration fees (One Time Fee): Quoted
This will be dependent upon the size, type and condition of the data.

Optional Items (One Time Fee): Quoted
-- Substantial program changes
-- Creation of Forms and/or Certificates
-- Special equipment (eg: embosser)

On our website, you will find a tab for Screen Shots. This displays many examples of the available features to our Program. If you wish to go through a 'live' and fully functional demo version, please call us to setup up your Demo Account, and then you can explore just how the system works.

We can be reached at: 541.825.8580, or registrar@glmregistry.com

And if you have reached the end of this presentation, we THANK YOU for sticking with it! ☺
